1. General

Dear customer,

Congratulations on purchasing a BURY telephone holder for cellular phones. You have chosen a high quality product that is extremely easy to use. Please read the installation manual carefully so that you can fully enjoy your BURY product.

If you have any further questions concerning installation or operation of this device, please contact your dealer. He will be happy to give you reliable advice. You can also contact our hotline. Our phone and fax numbers are listed in the chapter Service.

Have a good trip!

2. Security guidelines

Power supply

The power usage of the cradle has been designed for the use in vehicles with an on-board supply system of 12 volts (passenger car). If you intend to install the device in a vehicle with an on-board supply system of 24 volts (lorry), please use a voltage converter. If you have queries regarding this subject, please contact our hotline.

Position

Install the cradle in the vehicle so that your field of vision is not impaired and the components are not mounted in the impact zone of the passenger compartment or in the airbag inflation zones. Very important: please observe the car manufacturer's information (operating manual) as regards "accessories". If in doubt, please contact a specialist workshop to get information on the correct position for installation in the vehicle.

Intended use

We shall not be liable for damages or malfunctions due to improper use of the hands-free system. Therefore, do not expose the device to moisture, extreme temperatures or shocks and follow the procedure described in the installation manual carefully.

Use while driving

Operate the smartphone in the holder only when the situation allows it and when you do not endanger, harm, constrain, or annoy other road users. The volume of the smartphone has to be set in a way that exterior noise is still audible.

Important:

▶The driver is ultimately responsible for the safe operation and control of their vehicle at all times.

▶Research indicates that there is a risk to safety when the driver of a motor vehicle is distracted and using a mobile phone while driving can be a distraction.

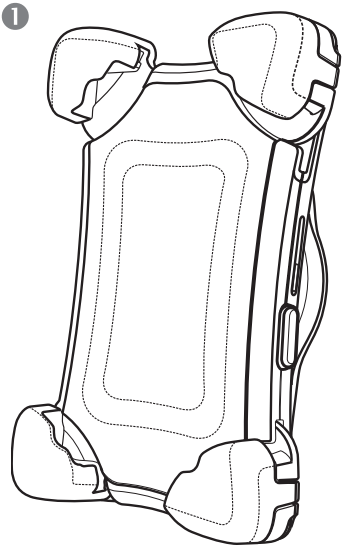
▶The manufacturer strongly recommends that you use a hands-free solution for a phone call when driving.

Faults

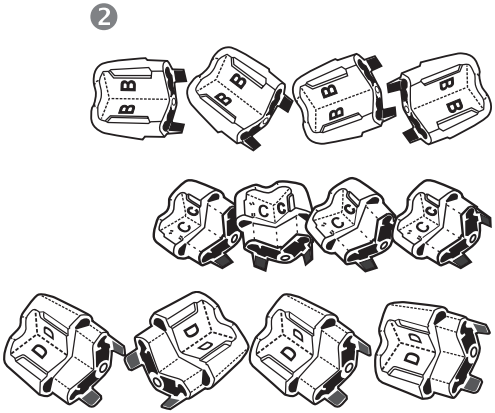
Do not use the telephone holder if you detect or assume a defect. In this case, contact a Bury specialised dealer or our hotline. Improper repairs can be dangerous for you. Therefore, only skilled personnel may perform inspections.

3. Scope of supply

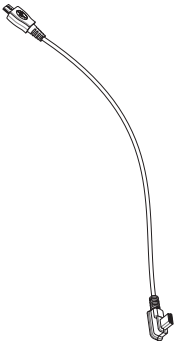
❶



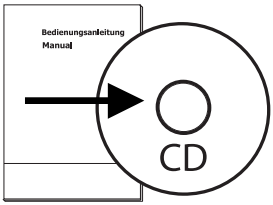
❷



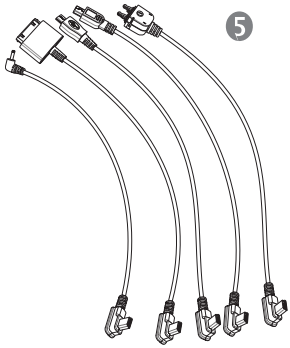
❸



❹



❺



The Take&Talk Universal is supplied with different combinations of components, depending on the sales regions (countries). The operating manual refers to all versions.

Description of the components:

1) Cradle
2) Set of tips for specific mobile phone models
3) Charging cable (Micro USB)
4) Installation and Operating manual on CD

Accessories - available separately / including, if applicable:

5) Five (different) charging cables (Micro-USB, Mini-USB, Nokia Pin 2 mm, iPhone, Sony Ericsson)

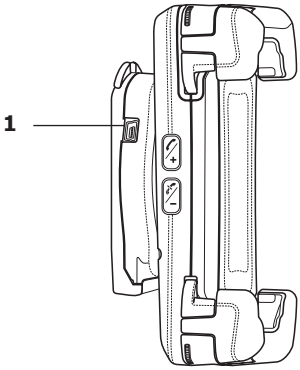
Note:

▶If certain components are added or omitted you will receive the corresponding information on a separate enclosure.

Connection options:

1. Power supply

Connection of the mobile phone's charging cable. The conduction of the power supply occurs via the BURY BasePlate.



4. Installation of the system

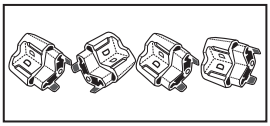
Important:

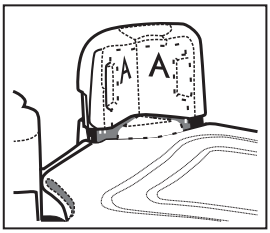
▶When positioning the cradle please take care that the device does not impair the view onto the road, that it will not be installed in the impact zone of the passenger compartment (amongst others in the airbag inflation zones) and that the cable may be laid without any problems.

▶Please avoid direct sunlight on the device or high internal temperatures, which can be rapidly reached in parked vehicles. In such cases, remove the cradle and put it in the car glove pocket or glove box for instance.

Step 1:
Adjusting corner fasteners to wide ranging models of mobile phone

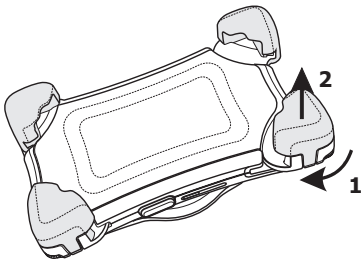
To be able to select the suitable type of corner fastener for a certain model of mobile phone / smartphone, please familiarize yourself with the corresponding compatibility list. This list is available on our internet site in the download area for the product at www.bury.com.





Important:

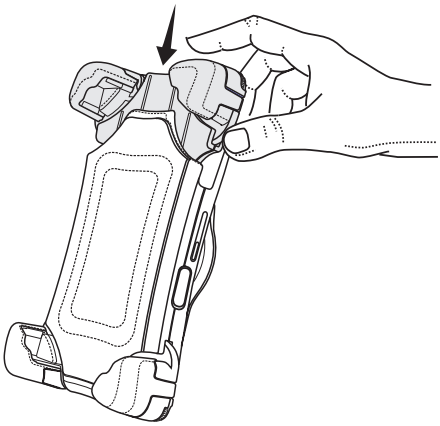
▶Every corner fastener set is equipped with a letter notation which is positioned on the interior side of the corner fastener.



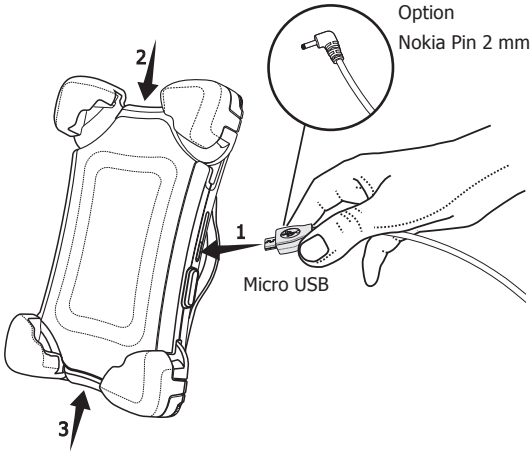
1. Turn the corner fastener with the rotary knob (**1**) in a clockwise direction.
2. Detach the corner fastener in the direction of the arrow (**2**).
3. Fit the correct ending for the corner fastener and tighten it by turning it anticlockwise.
4. Repeat the above steps with the remaining three corner fasteners.

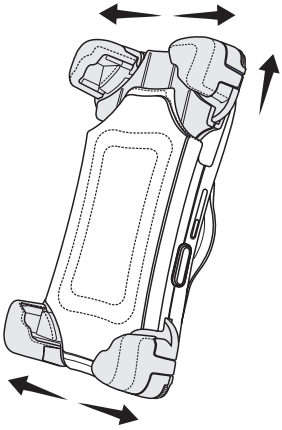
Step 2:
Adapting the Take&Talk Universal to the size of the mobile phone

Important:
▶Before you begin to adjust the cradle to fit your particular mobile phone, it is important that you set the cradle to the closed position. This can be done by pushing the top of the cradle down until the locking button on the right side of the cradle, pops out with an audible "click".

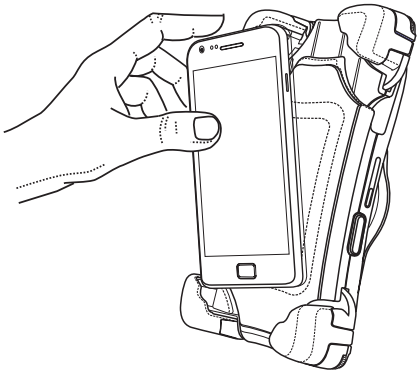


To be able to adapt the cradle to the size of the mobile phone lift all of the adjustment locks by pressing the release buttons **1**, **2**, **3**.

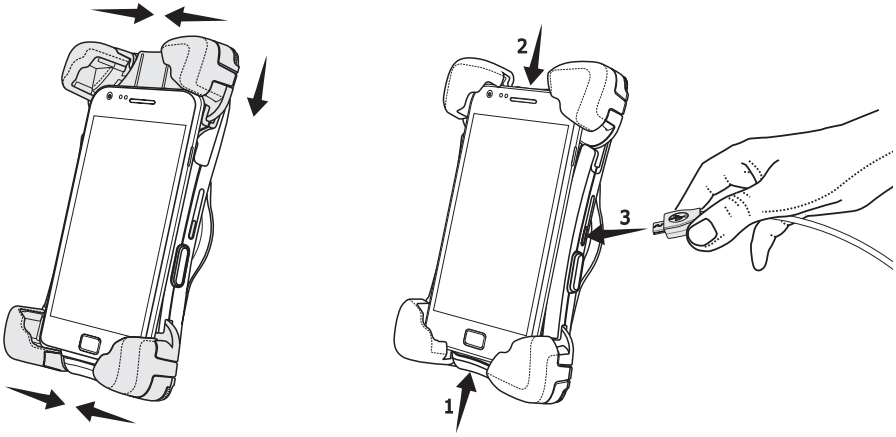




Insert the mobile phone into the cradle.



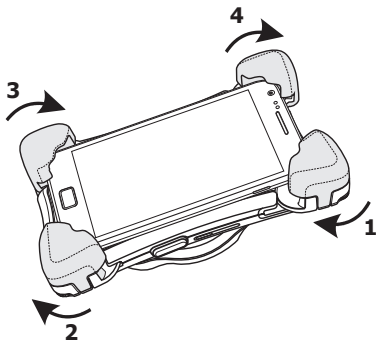
Firstly, adjust the lower width of the cradle to the width of the mobile phone and press button **1** in order to block the set position. Next adjust the height and the upper width of the cradle to the height and width of the phone and press in keys **2** and **3** in order to block the set positions.



Please note:

▶It is possible to set all positons of the cradle at the same time by lightly pressing button **1**, **2** or **3**.

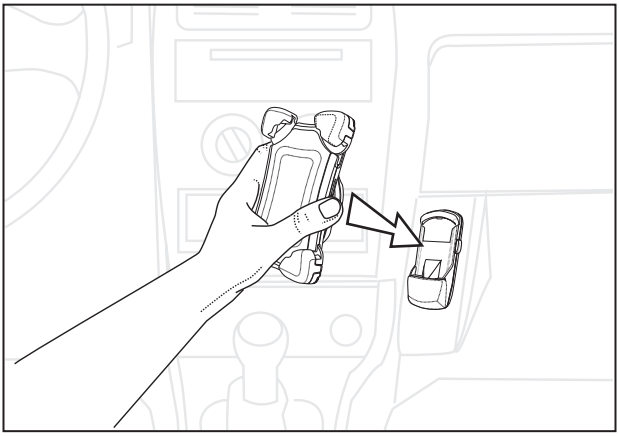
Step 3:
Adjusting the corner fastener

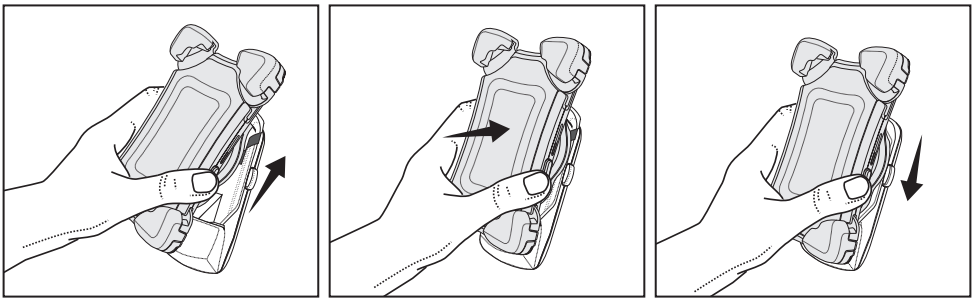


Adjust the corner fastener to the thickness of the phone – increase the depth by turning it in a clockwise direction, tighten it by turning it anticlockwise.

5. Installing the Take&Talk Universal in the vehicle

Place the Take&Talk Universal cradle in the BURY BasePlate.





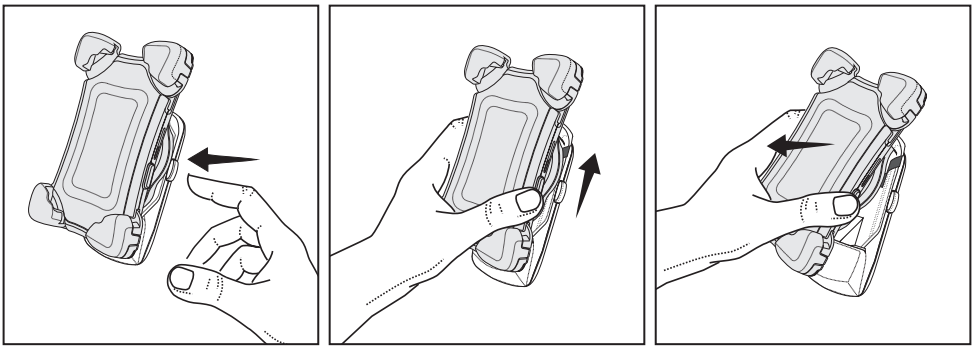
Important:

▶The correct mounting of the Take&Talk Universal in the BURY BasePlate is signalled by a perceptible ‘clicking’ sound.

Removing the Take&Talk Universal cradle from the BURY BasePlate.

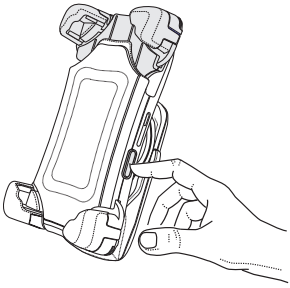
Important:

▶Before you remove the cradle from the BURY BasePlate you will have to remove the blocking mechanism by pressing the locking button on the right hand side of the BURY BasePlate.

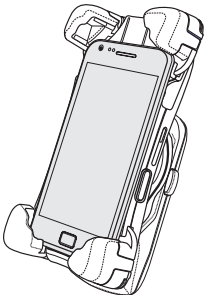


6. Inserting and removing the mobile phone

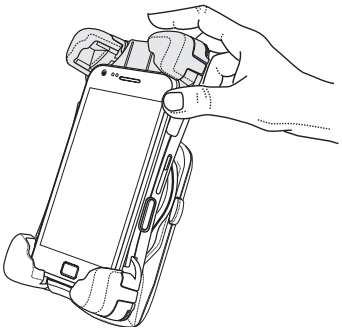
Insert the smartphone in the Take&Talk Universal cradle.
Before you insert the smartphone in the cradle, release the holding mechanism by pressing the locking button in. The locking button is situated on the right hand side of the cradle.



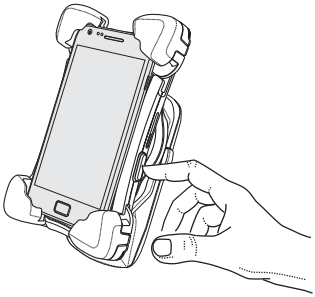
If necessary, remove the protective cover from your smartphone. Place the smartphone in the cradle from above.



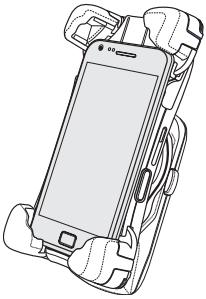
Press the top part of the cradle downwards and you will hear the smartphone click into the cradle. The correct positioning of the smartphone in the cradle is signalled by a perceptible 'clicking' sound.



Removing the smartphone from the Take&Talk Universal cradle.
To release the locking mechanism press the button on the right hand side of the cradle.



Now remove the smartphone by lifting it out of the cradle.



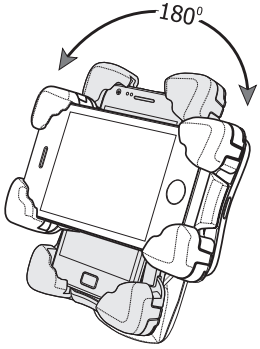
7. Rotating the cradle

You can turn the smartphone by 180 degrees (90 degrees to the left or right accordingly) together with the cradle. Rotate your device to best suite the application you are using. Used in the landscape (horizontal) format, most smartphones will adjust the text size and websites images automatically making them easier to read. Using the cradle to the landscape format also gives more space for the onscreen keyboard making it easier to enter text data.

Important Safety Notice:

▶Entering text or viewing websites on your smartphone whilst driving is extremely dangerous and illegal in most countries. Always ensure your vehicle is stationary and safely parked before using your smartphone for these activities. Setting your cradle or phone screen format should be done before commencing your journey.

Navigation applications especially benefit from the landscape format view because all the operational elements of the software are positioned clearly. Due to the reduced horizon in the landscape format, the 3D map presentation will probably contain significantly more detailed information.



8. Initialising the Take&Talk Universal

After the power supply of the BURY BasePlate is successfully connected, the Take&Talk Universal is activated when you have started the vehicle.

The Take&Talk Universal has an inductive antenna coupling. This means that the functioning of the integrated antenna in the corresponding smartphone is transferred to an external antenna. This also means that a GSM antenna must be connected to the BasePlate of the hands-free car kit which is being used, otherwise the send-receive performance will be restricted.

9. Establishing a *Bluetooth* connection

If you wish to establish a *Bluetooth* connection for the first time, you have to activate the *Bluetooth* function of your mobile phone and search for *Bluetooth* devices. In this case search for a device labelled „T&T Universal ...". If several devices were identified, please select the Take&Talk Universal and enter the PIN number 1234. The *Bluetooth* connection (pairing) will then be established between your smartphone and the Take&Talk Universal.

Please note:
▶Searching for *Bluetooth* devices and establishing a *Bluetooth* connection may take 2-3 minutes.

In the event of a successful connection with the cradle, a corresponding message will appear in the display of the smartphone. If it is not possible to establish a connection, please check and update the software release of your smartphone. An overview dealing with this subject can be found on the Internet at www.bury.com. If you have questions with regard to the menu navigation, functions and operation of your smartphone, please refer to the operating guidelines of your smartphone. Depending on the manufacturer and type, this considerably differs from each other.

Note:
▶If the rechargeable battery of the smartphone is low, it is sometimes not possible to establish a *Bluetooth* connection.

If you wish to cancel a *Bluetooth* connection, you can either disconnect it conveniently at the Take&Talk Universal or at your smartphone. In addition, the connection is disconnected, if you move too far away from the vehicle while taking your smartphone with you and thus leave the reception radius of the Take&Talk Universal.

Note:
▶If the vehicle's power supply system is switched off then the current *Bluetooth* connection is automatically interrupted. If a telephone call is made in the interim time then the connection will continue until the telephone call is concluded.

The *Bluetooth* connection is automatically re-established only if you re-enter the reception area of the Take&Talk Universal (approx. 10 metres) and if you want to perform or receive a phone call. Exceptions here to are some smartphones which only re-establish the *Bluetooth* connection after the confirmation of a message.

Thanks to the **Multipoint Function** you are able to connect two mobile phones at the same time with the Take&Talk Universal via *Bluetooth*. You operate this function with the plus button on the cradle. The mobile phone connected most recently is given priority which means all of the functions described in the table (on page 15 of this guide) refer to this telephone.

After switching the Take&Talk Universal on the system will connected with the smartphone that was most recently connected. The condition for this is that this phone is in the vehicle, the *Bluetooth* function is activated and the interfacing identification to the cradle has not been deleted.

If another phone rings suring the current phone call then the incoming call can be declined by pressing the end button on the phone.

In the case of there being incoming calls on each phone at the same time, then the incoming call on the second phone can only be received after the first call has been declined. It is also possible to end the first call and to then decline the second call (both steps are completed by pressing in the minus button), or to end the first call and to then immediately answer the second call (by pressing in the plus button). Putting the first phone call on hold is not possible, however, because the same phone number is not being called.

Note:

▶Please comply with the country-specific laws concerning in-car telephone calls.

Take&Talk Universal									
Status	**Status description**	**Press Plus key short**	**Hold Plus key for 3 seconds**	**Press Minus key short**	**Hold Minus key for 3 seconds**	**Hold Plus and Minus key for 3 seconds**	**Press Minus key twice**	**Hold Plus and Minus key for 6 seconds**	**Press Plus key twice**
Stand-by	When Take&Talk Universal is not connected with phone	-	Connecting with last connected phone, if not available try to connect to a phone from phone list	-	-	-	-	Reset to default	-
Connected	When Take&Talk Universal is connected with phone, no call	-	Multipoint on/off (4 same beeps is on)	-	Disconnect Bluetooth	Turn on / off DSP* in the hone (Tones up is on, Tones down is off)	Redial	Reset to default	Calling the last saved number

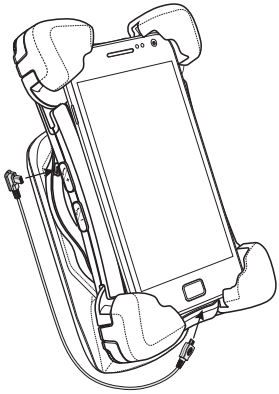
Active call	When Take&Talk Universal is connected with phone and call is active	Volume up	Save the phone number of current connection	Volume down	Quit call	Turn on / off DSP* in the device (Tones up is on, Tones down is off)	-	-	-
Outgoing call	When Take&Talk Universal is connected with phone and call is active	-	Save the phone number of current connection	-	Quit call	Turn on / off DSP* in the device (Tones up is on, Tones down is off)	-	-	-
*DSP = to filter out echoes and background noise									

11. Charging the phone in the cradle

If a corresponding cable is connected to the telephone, the smartphone that is positioned in the Take&Talk cradle will be supplied with electrical power (please refer to the picture). The conduction of the electricity supply occurs from the BURY BasePlate. In this context it is of no importance as to whether or not there is active *Bluetooth* connection between the mobile phone and the Take&Talk Universal.

Please note:

▶Please note that the capacity of your mobile phone‘s storage battery can quickly decrease when the *Bluetooth* function is active. If you do not want to use the *Bluetooth* function anymore, e.g. if you leave the vehicle for a longer period, it is recommended to deactivate this function.



12. Service

In case of general or technical queries, suggestions and comments, please do not hesitate to contact our team at any time. Suggestions and feedback are always welcomed:

Germany

Specific explanations regarding the assertion of claims based on defects of the product (warranty / guarantee / service) for certain countries can be found at the end of these instructions.

Information on the disposal of electrical goods in the EU
The crossed out wheelie bin symbol means that electrical and electronic products, batteries and accumulators must be disposed of separately in the European Union. Please do not dispose of any such products in your normal household waste. As the owner of a product of this sort you are legally obliged to dispose of it at your local dumping site or recycling centre, where you are able to leave your waste electrical goods free of charge.

13. Appropriate use of this system

The Take&Talk Universal is only intended for use with *Bluetooth* mobile telephones and music playback systems in motor vehicles. When using this system, please comply with the regulations and laws specific to the country in which you are driving and the instructions provided in the guidebook for the mobile telephone that you are using.

14. Approvals and declaration of conformity

At BURY, purchase, production, as well as distribution and service, follow environmentally friendly processes according to the ISO 14001 Standard and Quality Management Requirements, according to the ISO/TS 16949 Standard. The device has

CE the CE approval pursuant to the R&TTE 1999/5/EC regulation

e1 e1 type approval pursuant to the 2009/19/EC regulation
Electro-magnetic compatibility in vehicles

You can request a conformity declaration from the manufacturer of this product by post under the manufacturer's address which is stated above, or by writing to the following email address:
ce_conformance@bury.com
Please provide your email request in either English or German.
